

Error: 0x80010135: Path too Long

Posted by cmkb396 - 2013/03/16 23:37

Hello Forum!

To start on a positive note, I just finished my first all digital scrapbook. (Of our Disney vacation in early January) Yay! Because I wanted to get that scrapbook done, I've put off starting my Project Life pages until this weekend. I enrolled and completed all the tasks in Jessica's Project Life Class, and followed the link to download the Clementine Edition of Becky Higgin's Project Life collection from AC Digitals. However, when I go to unzip the files - I get the error message listed above and am unable to open over half of the materials I just purchased. I wondered if anyone in the forum knew how to fix this? I've sent an email inquiry to AC Digital, but haven't received a response. (Perhaps it is because it is the weekend?) How frustrating, though! I am all ready to go and I've hit this road block. I hope someone might be able to give me some advice so I can really get to rock n rolling on my album! Thanks in advance, friends!

They'll get back to you. There are some pretty amazing ladies on that site. :)

Congratulations on completing a digital scrapbook!!! :cheer:
