

Help with CC 2014

Posted by kimtaylor - 2015/05/21 12:27

Hello, I am attempting to dabble back into Photoshop. I was a pretty avid user of CS 3. I am now trying to work with CC 2014. I'm struggling with trying to see the "move" selection on my layout. I would like to move one item on a layered template. I'm on the correct layer, I have the move tool selected, but I cannot see the "selection." I thought back in CS 3 the item I wished to move was highlighted with a box around it. Is there a way to demonstrate this in CC 2014?

Thank you.
