

## Digital Page Sizes

---

There are as many ways to create a digital scrapbook page as there are scrapbookers, I think. But as far as page sizes go, I think these are the most common, and I would love to hear your thoughts:

- 12x12 inches, 300 pixel/inch (12-inch square)
- 8.5 x 11 inches, 300 pixel/inch (letter-size)
- 24x12 inches, 300 pixel/inch (2-page 12x12 spread)
- 8x8 inches, 300 pixel/inch (8-inch square)
- 12x8 inches, 300 pixel/inch (4x3 aspect ratio - the size of most digital photo frames)

Which of these sizes do you create most often, and why? Do you create at one size and print at another?

For me, I create pages almost exclusively at 12x12, but I've been hearing lots of requests for letter-sized templates.
